

LOST HILLS UTILITY DISTRICT

We are happy to announce Lost Hills Utility District has received a grant of \$25,000 from the **Wonderful Community Grants** for a New Aerator at the Wastewater Treatment Plant Facility

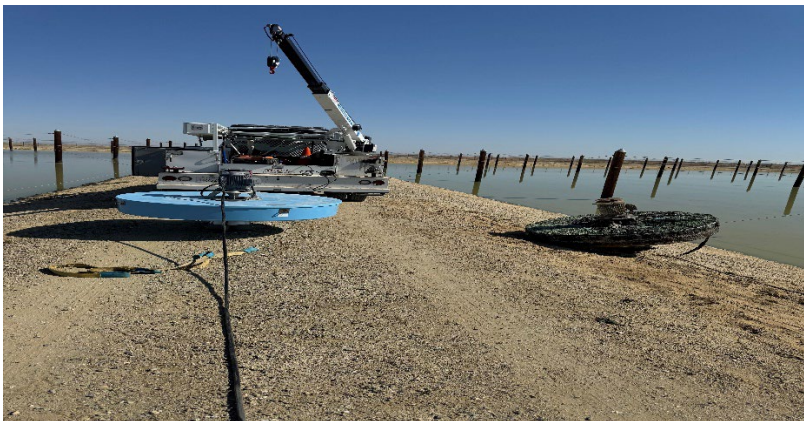

How will this New Aerator benefit our community?

- A new aerator system will improve the treatment process by increasing dissolved oxygen, circulating water to prevent stagnation and promoting beneficial bacterial growth that breaks down organic matter at the pond.
- The key benefit of an aerator is to decrease foul odors.
